

Access 2 Independence empowers individuals with disabilities to advocate for themselves in choosing their own goals toward achieving greater independence and integrated community participation. In addition, Access 2 Independence connects individuals with direct services to help individuals obtain the skills and supports they choose, in order to accomplish their self-determined goals. All of our services and assistance are FREE.

Our Five Core Services

Individual & Systems Advocacy

We will advocate for you as a member of the community. We can help you understand and stand up for your civil rights and responsibilities when dealing with the government, your employer, or other service providers.

Independent Living Skills Training

We can help you learn skills to increase and maintain your independence. We want to help you identify and work toward your goals, and we'll help you put together a plan to succeed.

Information & Referral

We can provide information about community resources that can help you accomplish your personal goals. Some examples are: acquiring and learning to use assistive technology; understanding and signing up for Medicare, Medicaid, Medicaid waivers, and Social Security; and finding accessible housing.

Peer Counseling

Teaching and sharing information related to life experience with a disability. Over half our employees have some type of disability. As you work to become more independent yourself, we can share with you our own experiences having a disability, encountering and overcoming barriers to our independence, and how we've become advocates for ourselves and for others.

Transition Services

Moving from nursing homes to a more independent setting such as 24hr site homes or independent homes with Home and Community Based Services to provide supports as needed.

Working with high-schools and Workforce Centers to develop post high-school plan.
